WHITEPAPER

A vibrant cosmic nebula with purple, blue, and white light trails, set against a dark space background.

Welcome to

The XODEX Launchpad

XOPAD is developed to launch the best
new projects on the **Xodex**
blockchain and make them accessible to
everyone in the cryptosphere.

The XODEX Launchpad, (XOPAD)

XOPAD aims to bring only the best new projects to the (XODEX) blockchain.

What Sets XOPAD Apart From Other Launchpads?

Security

Performance

XOPAD's Launchpad IDO Process

- 1: XOPAD holders can take part in the Presale.
- 2: Liquidity locked by the Smart Contract.
- 3: Tokens will be locked for 30 days.
- 4: Final approval process
- 5: Once the Softcap is reached, the project will be listed.

Trust First

- The core values of XOPAD are built on Trust
- The XODEX Team thoroughly checks every project that is going to apply for listing
- KYC check & Video Call with team
- Background check of the team
- Projects & teams experienced in crypto
- Check the aptitude of the project

XOPAD Launchpad Tiers S1

Project tokens offered on XOPAD Launchpad IDOs will be split into the following pools:

Lottery Allocation

XOPAD uses a tier system to allocate tokens for new IDOs. Low range tiers utilize our Lottery Allocation, where we raffle an allocated amount of tokens to purchase. Upon joining higher tiers like Gold, Platinum & Diamond investors get our guaranteed allocation, meaning everyone within that tier can purchase the guaranteed amount split evenly. Any unsold tokens from the first round will be made available to second tier and so on.

All tiered members can stake additional XOPAD tokens to jump tier.

In case IDO applicants have already existing partnerships with other launchpads, 10% of the project tokens are being kept as reserve.

XOPAD Launchpad **Fee S2**

Projects looking to launch on XOPAD will have various options:

Fee Allocation

Project IDO Owners will be able to launch a project on XOPAD for a small fee. Investors will be able to join a public or private presale with requirements set by the token Owner.

Benefits

- Low Listing Fee
- Whitelist
- Vesting Options
- Softcap to launch
- LP & Team LP Lock

10%
of the project tokens are being kept as reserve.

Basic Guiding Principles

RUGPULL PROOF

Projects are required to DOX and show document IDs to the XOPAD team.

REAL USECASE, UNIQUE & IN TREND

XOPAD will only list projects which have a real use case, is unique & in market trend. No pump & dump coins allowed.

FUNDS LOCKED

XOPAD will lock a percentage of the funds raised in the presale in case the project delivers below expectations, these funds will be used to refund investors.

Massive Potential

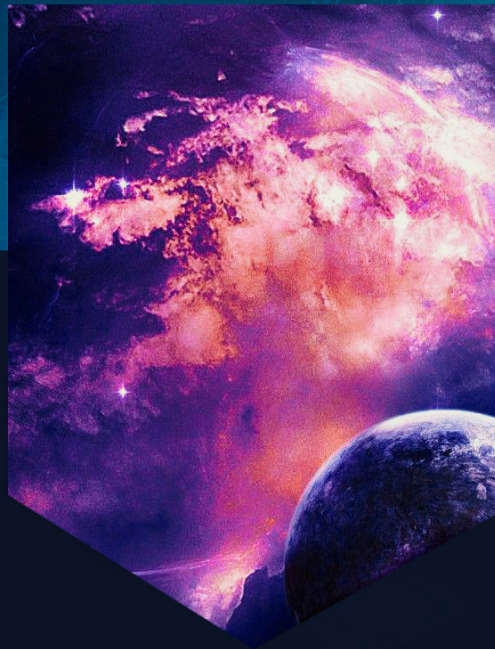

The crypto space has shown that Unicorns can multiply the value of their investments because they were early. We want all our investors to participate by guaranteeing an allocation in projects launching on XOPAD. This ensures that our investors can invest in projects launching in the XODEX blockchain early, giving them an exceptional risk-reward ratio, better than on any launchpad out there.

XOPAD Token Launch & **Tokenomics**

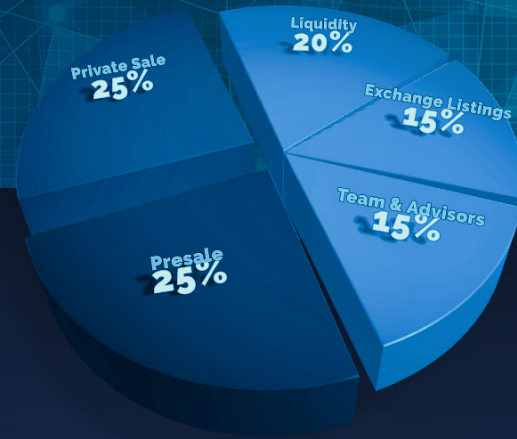

Our project wants to allow investors early access to great IDOs without whales or VCs getting easier access, we have decided to keep initial sale small as possible.

- Whitelisting
- Limited spots
- Small raise, so big upside potential after launch
- Fair allocation
- BSC Launch for Promotion

ROADMAP

Long Term Mission

We want to establish ourselves as a stable and go to launchpad for all projects that want to do an IDO on our launchpad. We will be making continuous effort in finalizing new deals and partnerships. Our goal is to bring many quality projects onto XODEX & Blue Chip blockchains. We are focused and dedicated to fulfill the vision and roadmap of the Xodex Launchpad, XOPAD.

Security Protocol

Security is the main priority of XODEX. XOPAD will undergo various security audits from some of the most respected auditors in the space. We will use high grade security solutions to dispatch IDOs with the strongest encryption technology available to prevent any likelihood of malicious attacks.
